

Crown Packaging Covid-19 Pandemic Plan Update

A Pandemic Preparedness and Response Plan has been fully implemented at our Crown Packaging operation, including daily scrutiny on the evolution of the virus and potential effects on our staff, customers, suppliers and product. Crown Packaging is committed to safeguarding our ability to supply and service our Customers through the progression and ultimate expiration of this disease.

Our Leadership Team meets daily to review all circumstances that may have changed both operationally or through regulations and recommendations outlined by the various health officials. The responses to those changes are effectively included in our Pandemic Response Plan and updated guidelines are communicated to employees immediately.

To Ensure Business Continuity, Crown Packaging has implemented protocols and measures recommended by both Federal and Provincial centers for disease control and prevention. These measures include increased sanitation and employee hygiene awareness, as well as, conveying all updates from health authorities arising out of the evolution of this virus. Employees have been encouraged follow social distancing recommendations and to self-isolate if found to be presenting symptoms of influenza. Break times have been staggered to mitigate group exposure and food safety standards are being stringently enforced. All truck drivers coming to the Crown Packaging facility are strictly prohibited from leaving their vehicles.

Continuity of Supply Chain has been elevated by reaching out to our suppliers to ensure they have taken the necessary steps to prevent any disruption in the delivery of our raw materials. We are working with our suppliers to certify there are no interruptions in our supply chain by requesting they have a contingency plan in place to prevent any stoppage in supply by either carrying more safety stock or confirming secondary supply locations.

The Health, Safety and Well-being of our employees, suppliers, and customers has always been a critical part of Crown Packaging's operation and business focus. To this end, all aspects of our operation are being observed and documented for any potential disruptions allowing us the opportunity to form a strategy to enable contingencies to be put in place.
